## Experience

---

### CMA CGM

Beirut, Lebanon

FULL STACK SOFTWARE ENGINEER

NOV 2020 – PRESENT

- Initiating and leading the development (React.js) of an internal UI library based on the company's design guidelines for usage across multiple projects
- Developing multiple front-end projects with heavy focus on clean code, testability, reusability, user experience and performance
- Building internal dashboards (React.js) consisting of various charts, graphs, and data tables for data management and visualization
- Collaborating with different team members including designers, business analysts, and product managers on product backlogs using JIRA and following Agile methodologies
- Working within the API team to build back-end APIs in a microservice architecture, with responsibilities including design and documentation (Swagger), development (Spring boot), testing (Jmeter, Cucumber), and deployment (XLRelease, XLDeploy)
- Integrating a UI testing strategy consisting of end-to-end (Cypress) and component (react-testing-library) testing tools into existing CI/CD pipelines

### Webneoo

Beirut, Lebanon

FULL STACK DEVELOPER

AUG 2020 – NOV 2020

- Developed and maintained an in-house API based ecommerce platform built using PHP Laravel framework
- Built sleek and responsive UIs using Bootstrap CSS and followed design and accessibility guidelines
- Worked on and maintained various ecommerce, marketing, and portfolio websites
- Communicated with clients directly and integrated a tight feedback loop into the product development process
- Worked in an agile environment with weekly sprints and daily meetings for continuous progress updates

### Libro

Beirut, Lebanon

SOFTWARE DEVELOPER

JUN 2019 – OCT 2019

- Designed and developed the API backend (Node & Express) for a jobs platform adhering to API design best practices
- Built a web interface for the platform using React.js and Redux
- Used various testing strategies (unit, integration, e2e) to validate functionality
- Worked in an agile way using Scrum framework and Jira to collaborate with the team
- Participated in code reviews to assess code quality and maintainability

## Skills

---

- **Technologies & Tools:** JavaScript - TypeScript - Node.js – Express.js - React.js - Redux - PHP - Laravel - Java - Spring Boot - CSS (Bootstrap, Tailwind) - Databases (MongoDB, MySQL) - Testing (Cucumber, Cypress, Junit, Jest, Jmeter)
- **Devops:** Jenkins - XL Release - XL Deploy - Rancher - Openshift - AWS - Docker - CI/CD
- **Software Design & Architecture:** Object Oriented Design - REST API Design (OpenAPI spec) - Microservices Architecture - Component Based Architecture - SOLID design principles – Design Patterns
- **Software Methodology & Tools:** SDLC -Test Driven Development (TDD) - Agile - SCRUM – Jira - Git

## Education

---

### Lebanese University

Hadath, Lebanon

Bachelors of Science in Computer Science

OCT 2017– AUG 2020

## Certifications

---

APRIL 2021 **Certified Cloud Practitioner**

AWS

MAY 2021 **Blockchain Essentials**

Cognitive Class
